

Advancing research. Sustaining excellence.

Every great library is built on what it can give its readers access to. As libraries gather at the 72nd ILA International Conference to chart the future of scholarship, Allied Publishers Subscription Agency is proud to stand with them — connecting Indian institutions to the world's research, one subscription at a time.

PROUD SPONSOR

Allied Publishers Subscription Agency*India's largest subscription agency

How Allied helps libraries advance research and excellence

01 One partner, every publisher

Authorised channel access to 1,000+ Indian and 100+ international publishers, so your library builds one relationship instead of hundreds.

02 The databases research runs on

Total Materia, ClinicalKey, UpToDate, JSTOR, EBSCO, Gale, JoVE and more — curated for medical, engineering, and scientific research needs.

03 Subscriptions that never lapse

End-to-end management of renewals, access, and entitlements, so your researchers are never locked out at the moment they need a journal most.

04 A local team, a global reach

Ranked among the top 25 subscription agents worldwide, with branches across India providing on-the-ground support for every institution we serve.

05 Five decades of trust

Since 1974, Allied has been the quiet infrastructure behind India's academic, medical, and research libraries — helping collections grow with the institutions they serve, so every acquisition builds toward a stronger library, not just a longer subscription list.
